Profile

I have been doing audio work since the Fall of 1992. I got my start at WKDU 91.7 FM, Drexel University student run radio station. My audio-specific work included recording, mixing and editing of everything from public affairs shows, public service announcements, station promos, live bands, interviews etc. In the years since I have expanded into other areas of audio work. In 2006 I starting doing location sound. Included is my list of location sound credits. References are available on request. Current equipment list on my website.
