

To whom it may concern,

Thank you for your consideration and time most of all!  
Quickly, I am making the transition from working on sets to working in creative development/production. I have spent 15 years as a camera assistant and I am actively pursuing new ground in which I can share my passion and love for creating in this vast industry. I am most interested in working within a production company that allows for growth and development specifically with an executive/creative producer.

Alongside my camera assisting experience, I maintain an extensive knowledge technically regarding film and HD cameras and in the overall operations of set production. I have managed multiple camera crews and saw various projects through completion, all the while being aware of the constant fast paced changes and acquiescing to them accordingly! I am very dedicated and hard working and most importantly, work exceptionally well within a TEAM fashion. I look forward to being an asset to your amazing team of professionals!

With my sincerest gratitude,

Julie Helton
