

I would like to express my interest in a position as production assistant.

Through film classes in high school to interning at multiple production companies, I believe I am the person you are looking for.

I am someone who is a problem solver, a quick learner, someone who can edit video and sound, and can multi task. I have taken multiple classes in multiple editing softwares, lighting, directing, acting, and cinematography. I love problems because they make me think about what I really want and how do I get there. Being a production assistant for a shoots has helped me use all of these skills and to really grasp them all.

My maturity, motivation, practical experience, and eagerness to learn and enter the entertainment world will make me an excellent addition.

Thank you so much for your time and consideration.

Sincerely,

Patrick T. Keenan
