To Whom it My Concern,

My name is Tod Lautenberg. I have been a working writer/editor for 17 years. I just finished directing my first 93 minute feature comedy "Puff". I am ready to hustle and make a name for myself. I have written 5 feature length comedies and am writing a sixth. We screened "Puff" at the Cannes Market last May and are building a new production company called Psychedelic Pictures to Produce Original content and assist others in reaching their vision. I just produced/edited/directed two web ads for 3 Guys Pies. I can write content on demand and am great with creating improvs and expanding scenes. Most importantly I can edit all of my own stuff. I own an AVID Symphony editing system and have worked as an editor on and off for 20 years. You get 2 in one with me. I love telling stories of all kind. This is fun work :)

My producer Jolana Opava makes everything run smoothly. Jolana Opava started out designing and sewing her own clothes and acting. She moved to Los Angeles from the Czech Republic and worked many jobs in the industry. Jolana was part of the Costume Department on independent features like "Dogtown" and Wim Wender's "Million Dollar Hotel". She moved on to production management and later business management. Jolana began to represent Tod Lautenberg as a upcoming Writer/Editor/Director triple threat in 2009. Jolana Opava oversaw the Production of "Puff" from Development to the Final Mix. Jolana is terrific at keeping everyone happy and things just roll and get done. People want to work hard for her because they enjoy it. Most importantly she keeps every crew well fed.

Here are some clips of things that I directed. I can get you a copy of the feature film "Puff" also.
