Summary

“Married to the hair industry” is how some admirers and colleagues would describe Ryan Burrell. Born into haircare as the son of a hairstylist; it did not take long for Ryan to realize his calling was not that of a traditional 9 to 5 in corporate America but with those of an artistic touch. At 19, he realized his passion was grooming healthy hair *and* working with those who had different hair textures was *his thing!* His inspiration; not uncommon to an artist of course, are often found in nature and natural settings. His work has been featured in many print and editorial columns both past and present such as *People Magazine* (April 2018), *Vogue IT* (2016), and *Allure* (January 2014). Mentioned in *Modern Salon* as *One to Watch*; Ryan’s career is thriving and he has established himself as the *Go To* editorial hairstylist in the modern day.
